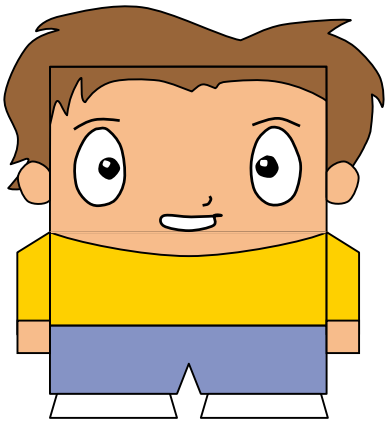
hair - fold, glue, & cut
cut and remove "ear box"
glue hair here

How to Assemble



Print page 1, the one with the parts on it (save ink… don't print the instructions!) Print on **thick paper**, like 67 lb. or 110 lb. cardstock.

For the best folds, score each folding edge with a knife or round-ended scoring tool… if you have one of those. I don't know why you would; I don't have one! Maybe you are an heir to a real printing shop, I dunno.

Hair Assembly -

- First, cut out the white area with the ears in it.
- Then, score the underside of the hair top where it edges with the hair back (the large brown area).
- Fold the hair in half at the grey line and glue the hair together.
- Cut through the glued hair part around the difficult hair-shaped curves

Body Assembly -

- Score and cut out body part
- Glue together tab 1 and the side of Wigu's body, then glue all tab 2's
- Cut out the pants bottoms and remember to reverse score at the dotted grey line, then glue the pants bottoms to the tab 3's

Ears - These go together like the hair. Score the grey line, cut out the white boxes, fold, glue and then cut out the ears

Arms – Tiny and hard to handle, but you can do it! "Tacky Glue" is your friend here. Glue the side tab together first, then do each end separately.

Shoes – Almost as tricky as the arms, but tacky glue makes it not so tricky. You'll be glueing three tabs at once – make sure you don't crush the shoe with excessive rage forces.

Finally – Glue everything together. Ears, hair, shoes and arms. You can glue the arms on anywhere, to make your own arm expressions. This is your chance to show the world what you can do with arm-posing! Go get 'em!
